

Technical Data Sheet

911 Calcium Wash

High Performance Calcium Deposit Remover for Offset Printing Rollers

DESCRIPTION

911 Calcium Wash is a powerful liquid cleaner specially formulated to remove stubborn calcium deposits, paper coating residues, glazing, and other mineral contaminants that gradually accumulate on the surface of offset printing rubber rollers. These deposits reduce roller ink transfer, disturb ink-water balance, and lead to print quality issues such as scumming, uneven ink density, and excessive dot gain. Its advanced cleaning formulation penetrates and dissolves hardened calcium build-up without damaging the rubber surface, restoring the original velvety finish and improving roller performance. Regular use helps maintain optimum ink transfer, extends roller service life, reduces press downtime, and ensures consistent print quality. Suitable for use on all conventional sheetfed, web offset, and UV printing press rubber rollers.

FEATURES & BENEFITS

- Rapidly removes stubborn calcium deposits and mineral build-up
- Restores the original velvety surface of rubber rollers
- Improves ink transfer and ink-water balance
- Eliminates glazing caused by paper coating residues
- Enhances print consistency and colour stability
- Extends rubber roller service life
- Reduces press downtime and maintenance frequency
- Easy-to-use liquid formulation with excellent cleaning efficiency

APPLICATIONS

- Sheetfed offset presses
 - Heatset web offset presses
 - Coldset web offset presses
 - Newspaper presses
 - Commercial printing
 - Packaging printing
- Suitable for all conventional rubber rollers

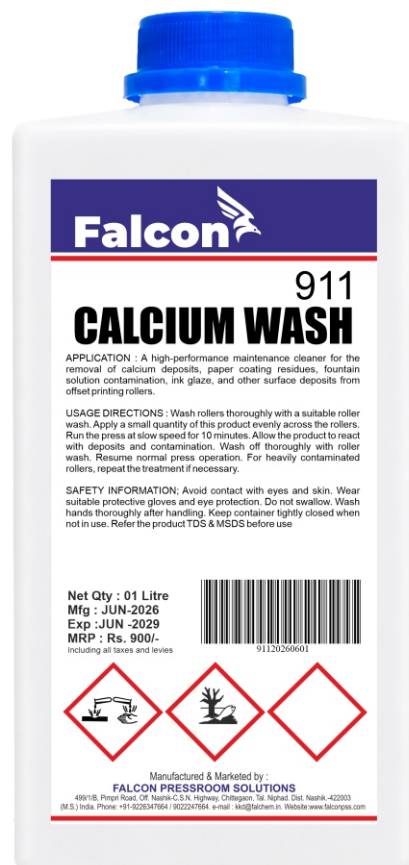

DIRECTIONS FOR USE:

Recommended for deep cleaning of:

- Oscillating ink rollers
 - Distributor rollers
 - Form rollers
 - Dampening rollers
 - Intermediate rubber rollers
 - Rubber rollers affected by calcium or paper coating deposits
- Suitable for conventional, UV and hybrid offset

Property	Specification
Appearance	Clear Liquid
Colour	Colourless to Pale Yellow
Odour	Mild Characteristic
Solubility	Miscible with Water
Application	Deep Cleaning of Rubber R
Packing	1 Litre Bottle
